

Saurabh JHA

SOFTWARE DEVELOPER

saurabhjha0408@gmail.com

8765432544

Bangalore, Karnataka – 560037

Objective:

Seeking a challenging role in software development within an environment that fosters growth, excellence, and continuous learning, enabling me to contribute to organizational success while advancing my professional skills and fulfilling personal aspirations.

Professional Summary:

- **3.10 Years** of experience in **Software Development**.
- **3+ Years** of technology expertise in **C++ & C programming**.
- Experience in working with **Git & Linux**.
- Good Knowledge of RLC, MAC, PHY, PDCP, and RRC layers, with experience in implementing features like TA, KPI stats, and Paging and worked on their Test Coverage.
- Proficient in Wireshark for log capturing and analysis.
- Basic Knowledge in Python, Robot Framework.
- Worked on tools like: WinSCP, VS Code, JIRA, MobaXterm.
- Contributed to the development of POS terminals application such as Vx 520, Vx675, Vx680, V20m, P400.
- Technology expertise in WordPress web development, HTML, CSS.
- Excellent problem solving and good communication skills.
- High adaptability towards learning, implementing and practicing the new technologies, frameworks and products.

Educational Qualification:

- Bachelor of Technology (B.Tech), DRIEMS Autonomous, Odisha, 2016 – 2020, CGPA: 7.6
- 12th Grade, B M Memorial Women's College, Odisha, 2013 – 2015
- 10th Grade, ST.XAVIER'S HIGH SCHOOL, Odisha, 2012 – 2013

Work Experience:

- Currently working with **Collabera Digital**, for client **DELL** since August 2022 to Present as **Software Developer**.
- Worked with **P2P System Pvt. Ltd**, Noida since June 2020 to May 2022 as **Software Developer**

Project Details: (DELL)

1) Project Name: 5G-RAN

Languages: C++, C

Description: 5G NR technology system for RAN (CU & DU). The project involves deploying a 5G RAN infrastructure to provide high-speed wireless connectivity to users. The primary objectives include enhancing network capacity, improving coverage, and enabling advanced 5G services such as ultra-reliable low-latency communication (URLLC) and massive machine-type communication (mMTC).

Contribution: As a team member, was responsible for:

- Collaborated with senior developers to troubleshoot issues and implement feature enhancements.
- Assisted in the development and testing of software modules for a 5G network.
- Worked on bug fixes and defects.

Project Details: (P2P System Pvt. Ltd.)

2) Project Name: APACS Application

Languages: C

Description: Payment application supporting the all the payment transactions with V240m and v200c devices. The project involved in enabling standard payment transactions such as purchases, refunds, and voids, the project also focused on enhancing security features to meet industry standards and regulatory requirements.

Contribution: As a team member, was responsible for:

- Handled application issue fixes as a backup resource.
- Code review and bug fixing.
- Engaged in minor development tasks.

Technical Skills:

- Programming Languages: C++, C, Python(Basic)
- Operating Systems: Linux
- Version Control: Git
- Development Tools: VS Code, Wireshark, WinSCP, MobaXterm
- Web Development: HTML, CSS, WordPress
